How To Use This Manual

This manual simplifies the task of ordering parts for your Gillig Phantom. Each page illustrates and lists the break-down of parts for a component or system on your coach. This enables maintenance and service personnel to identify and order parts quickly and efficiently. The new two-page format presents parts lists and illustrations on facing pages, facilitating parts identification by providing larger and sharper text and illustrations. Please refer to the illustration on the following page for an explanation of all the common elements used on each page of this manual.

Parts information in this manual is arranged in the same order as the Gillig bill of material. Each page represents a sub-bill from the bill of material. A page may represent more than one bill. Occasionally a single bill can be broken down on more than one page. A list of all bills used on a page appears in the lower right corner of the illustration page. Page numbers, located at the bottom each page, consist of a prefix at the outside, which corresponds to a bill number, and a page number in the center. An extensive table of contents and index is included in this manual to help you identify the part you need. The index lists parts both alphabetically by part name and numerically by part number.

The abbreviations A/R (As Required), and N/S (Not Shown) appear frequently throughout the manual. As Required indicates that a part should be replaced in measurements or quantities determined by the customer. The other abbreviations that appear throughout this manual are taken from the American National Standards Institute (ANSI).

Information in this manual is for the Gillig Phantom coaches listed in this manual only. Do not use this manual as a basis for ordering parts for any other Gillig coaches in your fleet. Additional copies of this or any other Gillig publication may be purchased by contacting the Gillig Parts Department. We hope you find this manual user-friendly, and we welcome your comments, questions, or suggestions regarding this manual or your Phantom coach. You may contact the Gillig Corporation by phone, fax, or letter.

GLAZING PART NUMBERS

The base part numbers (**82-12026**-xxx) are the same for any window of a certain type and size, regardless of the glazing which was installed to comply with customer specifications. The suffix number (82-12026-**010**) is used to identify the specific glazing desired. The table below lists the various glazings in use at the time this manual was printed. The glazing in your coaches can be found in the Specification Section of this manual. In addition, your Parts Representative will gladly assist you in identifying the unique part number suffix of the glazing used in your coaches. (SAR, Lucite or Alma=Plastic and Lam=Glass). For frames which are clear anodized add 'C' to the appropriate number.

Suffix	Glazing	Suffix	Glazing
x01	1/4" 16% Gray SAR	x02	1/4" 44% Gray Lam
x03	1/4" 28% Gray Lam	x04	1/4" 28% Gray SAR
x05	1/4" 17% Gray Lam	x06	1/4" 73% Green Lam w/o Shade Bar
x07	1/2" 28% Gray SAR	x08	1/4" 89% Clear Lam
x09	1/4" 92% Clear SAR	x10	
x11	1/2" 92% Clear SAR	x12	1/4" 55% Gray Lam
x13	1/4" 76% Gray SAR	x14	1/4" 55% Gray SAR
x15	1/4" 55% Blue SAR	x16	1/4" 46% Gray SAR
x17	1/4" 28% Bronze SAR	x18	1/4" 28% Bronze Lam
x19	1/4" 44% Gray SAR	x20	1/4" 17% Gray SAR
x21		x22	1/4" 92% Clear Alma
x23	1/4" 23% Brown Lam	x24	
x25	1/4" 28% Gray Almacoat 2000	x26	1/4" 73% Green w/ Shade Bar

RADIATOR FILL PROCEDURE
WARNING. COOLANT IS UNDER PRESSURE AND EXTREMELY HOT AFTER THE ENGINE IS RUNNING. WAIT UNTIL BOILING STOPS AND THE ENGINE HAS COOLED BEFORE PRESSING THE RELIEF VALVE.
1. PRESS AND HOLD THE RELIEF VALVE (VENT COCK) AT THE SURGE TANK TO RELIEVE PRESSURE FROM THE SYSTEM.
2. OPEN ENGINE BLEED VALVES (LOCATED ON TOP OF BOTH RADIATOR INLET PIPES)
3. FILL SURGE TANK UNTIL ONLY COOLANT FLOWS FROM BLEED VALVE(S).
4. RUN ENGINE @ 1200 RPM AND BLEED VALVES AGAIN (KEEP ENGINE RUNNING).
5. TURN MAIN HEATER SWITCH 'ON' AND SET DRIVER'S HEATER TEMPERATURE TO 'HIGH' (CONTROLS AT DASH).
6. WITH BOOSTER PUMP RUNNING, OPEN HEATER BLEED VALVES (LOCATED NEAR HEATER CONNECTIONS ON SIDE REAR OF UNIT) UNTIL ONLY COOLANT FLOWS.
7. CLOSE ALL BLEED VALVES AND TOP OFF SURGE TANK.
8. IF APPLICABLE, OPEN OPTIONAL GATE VALVES.
